THE MONTHLY SOURCE FOR RUTHMAN COMPANIES EVENTS AND INFORMATION

Merry Christmas!

and Happy Holidays to All, from all of us at Gusher and Ruthman Companies!

Performance Racing Industry Show a Success!

25 Performance
Racing Industry
SHOW
NOV. 29 - DEC. 1, 2012
Thursday, Friday, and Saturday
ORLANDO, FLORIDA • USA
Orange County Convention Center • North/South Building

Gary Smith reports a successful showing in Orlando selling Gusher to performance engine dyno customers as well as machine tool and parts washer customers.

New DIN Pumps

Les Smith reports Gusher is well into development on a new DIN metric close couple pump using IEC motors. The pump will feature a one piece shaft, the way they should be built.

An Invitation.....

Les is extending an invitation to visit the Gusher Williamstown and Dry Ridge plants and offices.

Feel free to contact us to schedule tours and/or training seminars in the coming year.

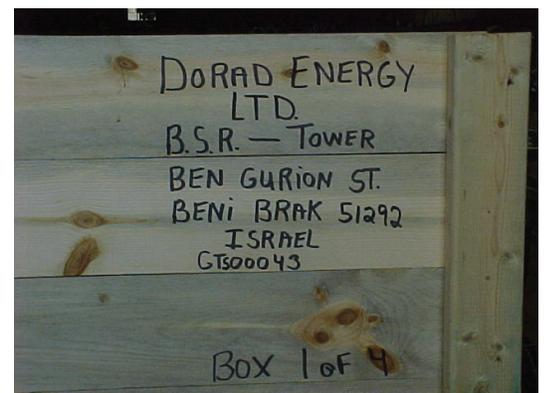

Chicago to the Middle East...

Nagle Goes Global...

Bill Hein reports a recent shipment of 4 Nagle submersible pumps with guide rails and quick disconnect assemblies for Dorad Energy, Israel.

Dorad Energy Ltd. is a partner in largest private power station in Israel on land of the Eilat-Ashkelon Pipeline Company (EAPC). The power contributes to the electricity economy by increasing production capacity and pushing to develop the utilization of natural gas and improving overall efficiency of the electricity sector in Israel.

More News from the 84 Group

Another boost from Gusher...

Dave Polcha of The 84 Group reports they are involved with another Marcellus Shale Project involving another Gusher end suction centrifugal ANSI pump for a water booster station.

Gusher model #PCL1.5x3-8SEH-CBM-A, 40 hp, 3450 rpm will be introduced with 150 gpm at 150 psi and boosting the discharge pressure to 250 psi.

The impeller will be left fully trimmed and the pump controlled by a Variable Frequency Drive. The entire pump package will be housed in a converted shipping container that will be modified to support the equipment through all 4 seasons with heating/air conditioning, 480/3/60 and 110/1/60 electrical power, piping, lighting, fans, outlets and man door. We are using a 40' container set up for a future dual pumping station utilizing a second Gusher Pump and Drive combination. The converted container will be transported to the drilling site and set on a cement pad with all piping and electrical connections conveniently located on the side of the enclosure. This is a very inexpensive way to house and transport pumping stations. Again this project was worked in conjunction with Amanda Green

New China Installation...
